The camera consumes too much power.
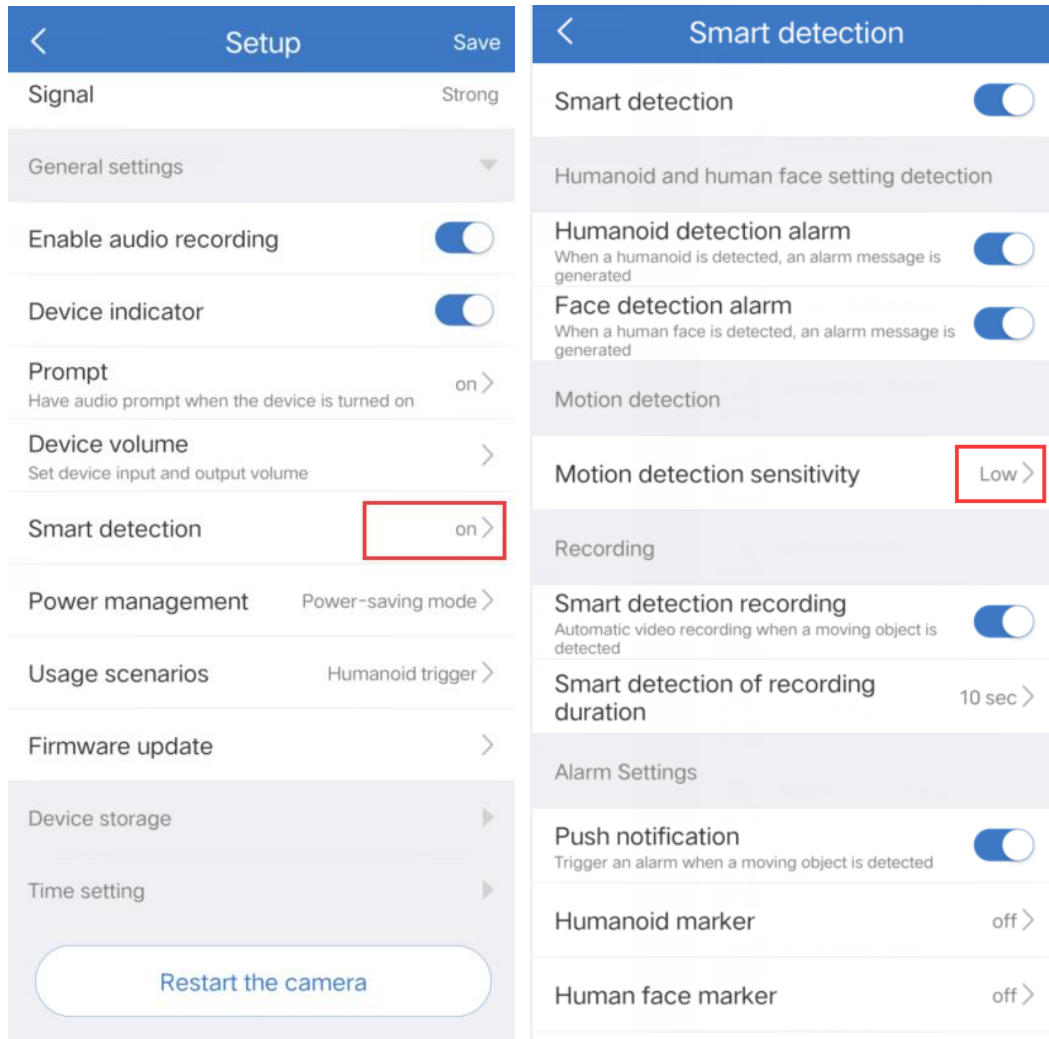

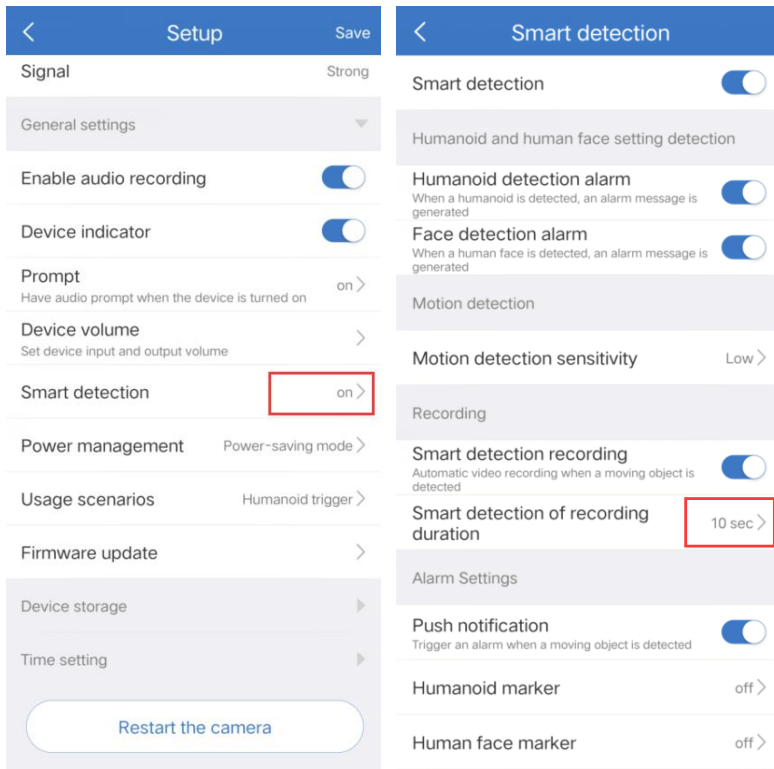

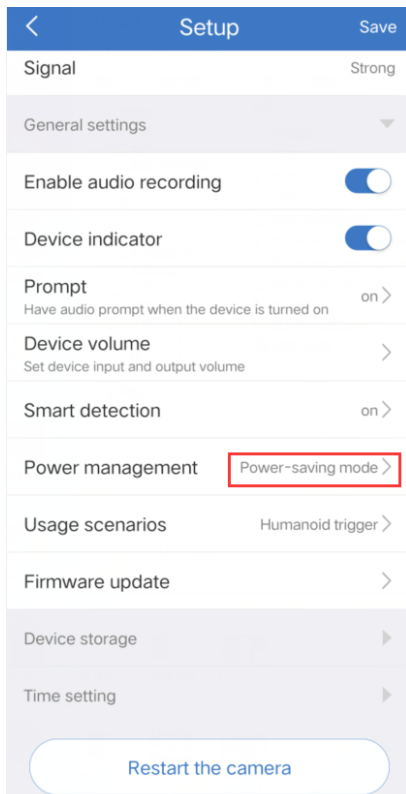

Solution:

❶ Adjust the position of the solar panel to receive more sunlight

❷ Adjust the monitoring position of the camera to avoid the place where a large number of people go in and out

❸ Reduce the sensitivity of the camera: setting −−− smart detection −−− motion detection sensitivity select the "low "level

④ Select the shortest recording duration: setting ――― smart detection ――― smart detection recording "10 sec".

⑤ Select the mode with lower power consumption: setting ――― power management select "power-saving mode"

6 The alarm is triggered only when people are detected, but not when moving objects

are detected: setting --- usage scenarios select "Humanoid trigger" .

7 Connect it to a cell phone power adapter all the time.
